Summary

A maritime advisory reported Typhoon Champi approaching, with Ningbo calls under review and east China ports at risk. The decision was to watch Ningbo, with no option costed yet. Residual risk remains that east China ports, including Ningbo, could be disrupted.

Phrased by the auxiliary model from the figures below; it was given no number to invent.

Decision

Watch Ningbo; no option is costed yet.

Actions (0)

None were raised.

What the decision rests on

Every tool the team called, how much it read and where from. The rows themselves are in the Excel download, one sheet per tool (2 with rows).

Tool	Agent	Calls	Rows	Origin	Source
search_news	Milo	1	9	live	Google News
web_brief	Milo	1	1	derived	sonar web search on SAP AI Core

How the system reasoned (2 steps)

#	Stage	Agent	What	Origin
1	Data check	Milo	search_news(query=Ningbo port typhoon closure, days=14)	live
2	Data check	Milo	web_brief(question=Is Ningbo-Zhoushan port operating normally today?)	derived

Assembled from the stored record, not re-summarised by a model, so it says exactly what the log says. Generated by SIGAP on 27 Oct 2026 22:00 WIB.
